Jeff,

The QAPP was finalized long ago. We have had to revise it several times, and once recently, due to in-field changes in scope. I'd also like to point out that your need to look at the most recent version is to consider additional potential changes. This is a living document that keeps changing as field decisions arise.

Donna,

How is it at the QAPP is draft and not through internal review when the field work is almost done?

(??)

Jeff

Subject: Most recent version of the Iron King QAPP is attached...

Please be aware that this DRAFT version has not received internal review.
